## PROJECT SUMMARY

Multi-branch education platform: Go/Gin, PostgreSQL, Redis/Asynq, RBAC, outbox pattern. Production on Docker, AWS EC2, Terraform, ECR, GitHub Actions, with PostgreSQL backups to S3. Source is private; architecture and CI/CD are documented in a public case study.

## WHAT I OWNED

- Go API, schema, RBAC, and background jobs
- Outbox writes for email, SMS, and notifications
- Terraform VPC/EC2, Docker Compose, ECR publish
- CI: format, tests, lint, scan, deploy
